List of Contents

NUMBER 1

R. S. Hudson, L. L. Skrumeda and W. Whaling	1	Fe II level populations in a hollow cathode discharge
Randy D. May and Christopher R. Webster	5	Tunable diode laser measurements of linestrengths and line positions in the HNO_3 ν_3 band near 1335 cm^{-1}
L. Torop, D. G. McCoy, A. J. Blake, J. Wang and T. Scholz	9	Effects of the close approach of potential curves in photoabsorption by diatomic molecules—I. Theory and computational procedures
J. Wang, D. G. McCoy, A. J. Blake and L. Torop	19	Effects of the close approach of potential curves in photoabsorption by diatomic molecules—II. Temperature dependence of the O_2 cross section in the region 130–160 nm
Ronald D. Taylor and A. W. Ali	29	Absorption properties of a high temperature nitrogen plasma
M. S. Dimitrijević and S. Sahal-Bréchot	37	Stark broadening of neutral potassium lines
B. Rutily and J. Bergeat	47	The Neumann solution of the multiple scattering problem in a plane-parallel medium—IIa. Semi-infinite spaces and H-function
B. Rutily and J. Bergeat	61	The Neumann solution of the multiple scattering problem in a plane-parallel medium—IIb. The resolvent function in a semi-infinite space
B. Rutily and J. Bergeat	71	The Neumann solution of the multiple scattering problem in a plane-parallel medium—IIc. The specific intensity in a semi-infinite space
Note **Redus Holland and John L. Lyman**	79	Ultraviolet absorption spectrum of molecular fluorine
Software Survey Section	I	

NUMBER 2

Arno D. Steiger	81	Relativistic radiative transition rates and energies for the Li-like isoelectronic sequence: electric and magnetic dipole and quadrupole radiation
J. P. Bouanich	89	Analytic vibration–rotational matrix elements for high Δv infrared transitions of diatomic molecules

A. J. Blake and **D. G. McCoy** 113 The pressure dependence of the Herzberg photo-absorption continuum of oxygen

W. F. Kolbe and **B. Leskovar** 121 Millimeter and sub-millimeter wave detection of hydrogen peroxide

Y. T. Lee 131 A model for ionization balance and L-shell spectroscopy of non-LTE plasmas

Shoji Asano and **Akihiro Uchiyama** 147 Application of an extended ESFT method to calculation of solar heating rates by water vapor absorption

Note

M. Dang-Nhu and **A. Goldman** 159 Line parameters for C_2H_6 in the 3000 cm^{-1} region

Software Survey Section I

NUMBER 3

Shiaw-Ruey Lin, Sze-Tsen Lee and **Yuan-Pern Lee** 163 The S_{21} lines of the $A^2\Sigma^+(v'=1) \leftarrow X^2\Pi(v''=0)$ transitions of OH and OD

P. Varanasi, S. Chudamani and **S. Kapur** 167 Diode laser measurements of CO line widths at planetary atmospheric temperatures

P. Varanasi and **S. Chudamani** 173 Intensities and H_2-broadened half-widths of germane lines around 4.7 μm at temperatures relevant to Jupiter's atmosphere

S. Chudamani and **P. Varanasi** 179 Measurements on 4.7 μm CH_3D lines broadened by H_2 and N_2 at temperatures relevant to planetary atmospheres

W. E. Blass, G. W. Halsey and **D. E. Jennings** 183 Self- and foreign-gas broadening of ethane lines determined from diode laser measurements at 12 μm

W. E. Blass and **V. W. L. Chin** 185 Hydrogen and nitrogen broadening of the lines of C_2H_2 at 14 μm

George Birnbaum, Aleksandra Borysow and **Herbert G. Sutter** 189 Measurement and analysis of the far infrared absorption spectrum of the gaseous mixture H_2–CH_4

D. E. Glass, M. N. Özişik and **D. S. McRae** 201 Combined conduction and radiation with flux boundary condition for a semi-transparent medium covered by thin radiating layers

Z. Mijatović, M. Pavlov and **S. Djurović** 209 Asymmetry of the H_β central part measured in a T-tube

V. R. Murthy and **R. Jeevan Kumar** 211 Molecular polarizabilities determination of substituted benzenes from a new dispersion relation

Tsu-Jye A. Nee 213 Calculation of helium plasma satellites in turbulent plasmas

A. Goly and **S. Weniger** 225 Widths and shifts of some plasma-broadened oxygen and carbon multiplets

A. L. Crosbie and **L. C. Lee** 231 Relation between multidimensional radiative transfer in cylindrical and rectangular coordinates with anisotropic scattering

Software Survey Section I

NUMBER 4

Notice to Readers i

J. R. Tsai and **M. N. Özişik** 243 Transient, combined conduction and radiation in an absorbing, emitting, and isotropically scattering solid sphere

F. J. Coetzer, T. C. Kotze and **P. van der Westhuizen** 253 Radiative lifetimes of the $4p^4P^0_{5/2,3/2}$ levels in ArII from beam–foil experiments

Kouichi Kamiuto 261 The two-flux approximations for radiative transfer in scattering media

V. Kushawaha and **M. Mahmood** 267 Electronic excitation of HgX (X = Cl, Br, I) due to electron and methyl mercury halide collisions

P. S. Swathi, T. W. Tong and **G. R. Cunnington Jr** 273 Reflectance of two-layer composite porous media with linear–anisotropic scattering

Henry Szichman, Shalom Eliezer and **David Salzmann** 281 Calculation of the moments of the charge state distribution in hot and dense plasmas using the Thomas–Fermi models

R. E. H. Clark and **A. L. Merts** 287 Quantum defect method applied to oscillator strengths

R. D. M. Garcia and **C. E. Siewert** 295 The discrete spectrum for radiative transfer with polarization

D. Karabourniotis, S. Couris and **J. J. Damelincourt** 303 Determination of transition probability for the 655-nm Tl line

M. P. Dube and **K. J. LaGattuta** 311 Dielectronic recombination rates for ions of the magnesium sequence—II

Note
J. B. Tatum and **W. A. Jaworski** 319 A solution of Abel's equation

Corrigenda 323

Software Survey Section I

NUMBER 5

Gordon L. Olson and **P. B. Kunasz**	325	Short characteristic solution of the non-LTE line transfer problem by operator perturbation—I. The one-dimensional planar slab
Robin S. McDowell	337	Rotational partition functions for spherical-top molecules
David S. Kershaw	347	A fast method for computing the integrals of the relativistic Compton scattering kernel for radiative transfer
G. D. Tsakiris and **K. Eidmann**	353	An approximate method for calculating Planck and Rosseland mean opacities in hot, dense plasmas
Jérôme Perrin and **Ton Broekhuizen**	369	Radiative transfer in mercury-sensitized photochemical vapor deposition
Randy D. May, **Christopher R. Webster** and **Luisa T. Molina**	381	Tunable diode laser measurements of absolute linestrengths in the HNO_3 ν_2 band near 5.8 μm
Leonid Fukshansky	389	Absorption statistics in turbid media
Software Survey Section	I	

NUMBER 6

P. Varanasi and **S. Chudamani**	407	Self- and N_2-broadened spectra of water vapor between 7.5 and 14.5 μm
S. T. Thynell and **M. N. Özişik**	413	Radiation transfer in absorbing, emitting, isotropically scattering, homogeneous cylindrical media
O. Atanackovič, **J. Borsenberger**, **J. Oxenius** and **E. Simonneau**	427	Resonance line transfer and transport of excited atoms—III. Self-consistent solutions (2)
Alain Munier	447	Integral form of the time-dependent radiation transfer equation—I. Inhomogeneous slabs
Alain Munier	457	Integral form of the time-dependent radiation transfer equation—II. Inhomogeneous spherical media
Alain Munier	475	Integral form of the time-dependent radiation transfer equation—III. Moving boundaries
Software Survey Section	I
